| Mean (SD)                          | 24.7 (13.89)      | 25.7 (14.72)                     | 22.7 (12.32)                      |
| Median (Range)                     | 20.0 ( 5;62)      | 24.0 ( 6;57)                     | 21.0 ( 3;51)                      |
| Change from Baseline               |                   |                                  |                                   |
| n                                  | 33                | 34                               | 39                                |
| Mean (SD)                          | 1.9 ( 6.14)       | 2.5 ( 5.61)                      | 1.8 ( 3.77)                       |
| Median (Range)                     | 1.0 (-11;16)      | 1.0 ( -6;14)                     | 1.0 ( -7;13)                      |
| p-value(Dose Response) [1][2]      |                   |                                  | 0.873                             |
| p-value(Xan - Placebo) [1][3]      |                   | 0.712                            | 0.915                             |
| Diff of LS Means (SE)              |                   | 0.5 (1.30)                       | 0.1 (1.25)                        |
| 95% CI                             |                   | (-2.1;3.1)                       | (-2.4;2.6)                        |
| p-value(Xan High - Xan Low) [1][3] |                   |                                  | 0.783                             |
| Diff of LS Means (SE)              |                   |                                  | -0.3 (1.26)                       |
| 95% CI                             |                   |                                  | (-2.9;2.2)                        |

[1] Based on Analysis of covariance (ANCOVA) model with treatment and site group as factors and baseline value as a covariate.

[2] Test for a non-zero coefficient for treatment (dose) as a continuous variable.

[3] Pairwise comparison with treatment as a categorical variable: p-values without adjustment for multiple comparisons.
