

Table 1. Summary of Treatment Exposure and Compliance

Safety Analysis Set

| Parameter                | Statistic   | Treatment 1<br>(N=22) | Treatment 2<br>(N=28) | Treatment 3<br>(N=0) | Total<br>(N=50) |
|--------------------------|-------------|-----------------------|-----------------------|----------------------|-----------------|
| Duration (days)          | n (missing) | 22 (0)                | 28 (0)                | 0 (0)                | 50 (0)          |
|                          | Mean (SD)   | 74.6 (20.32)          | 81.4 (10.62)          | -                    | 78.4 (15.83)    |
|                          | Median      | 81.5                  | 84.0                  | -                    | 82.5            |
|                          | Q1, Q3      | 80.0, 85.0            | 80.5, 87.0            | -                    | 80.0, 87.0      |
|                          | Min, Max    | 20, 91                | 45, 92                | -                    | 20, 92          |
| Treatment Compliance (%) | n (missing) | 22 (0)                | 28 (0)                | 0 (0)                | 50 (0)          |
|                          | Mean (SD)   | 99.03 (4.792)         | 98.88 (3.428)         | -                    | 98.94 (4.040)   |
|                          | Median      | 99.95                 | 98.95                 | -                    | 99.35           |
|                          | Q1, Q3      | 98.30, 101.40         | 97.45, 101.25         | -                    | 98.00, 101.40   |
|                          | Min, Max    | 86.4, 105.5           | 91.3, 106.1           | -                    | 86.4, 106.1     |
| Duration (days), n (%)   | <7          | 0                     | 0                     | 0                    | 0               |
|                          | >=7 to <14  | 0                     | 0                     | 0                    | 0               |
|                          | >=14 to <28 | 2 (9.1%)              | 0                     | 0                    | 2 (4.0%)        |
|                          | >=28 to <42 | 0                     | 0                     | 0                    | 0               |
|                          | >=42        | 20 (90.9%)            | 28 (100.0%)           | 0                    | 48 (96.0%)      |
|                          | Missing     | 0                     | 0                     | 0                    | 0               |
|                          |             |                       |                       |                      |                 |

Percentages are based on subjects in the Safety Analysis Set within each treatment group.  
N = number of subjects; n = number in category; Q1 = first quartile; Q3 = third quartile; SD = standard deviation.
