

Table 6. ANCOVA Least-Squares Means and Treatment Comparisons

Analysis Population

Treatment	N	LS Mean (SE)	95% CI	Comparison	Difference (SE)	Comparison p-value
High Dose	116	-0.18 (0.265)	(-0.71, 0.34)			
Low Dose	96	-0.85 (0.291)	(-1.42, -0.27)			
Placebo	82	-0.33 (0.315)	(-0.95, 0.29)			
				Low Dose vs Placebo	-0.51 (0.429)	0.2323
				High Dose vs Placebo	0.15 (0.411)	0.7182
				High Dose vs Low Dose	0.66 (0.393)	0.0936

ANCOVA model: change = treatment + baseline HbA1c; LS means are evaluated at the overall mean baseline.
