

Table 7. Logistic Regression of Response by Treatment

Analysis Population

Treatment	N	Response n (%)	Odds Ratio vs Placebo	95% CI	p-value
Placebo	20	10 (50.0%)	Reference	-	-
Low Dose	20	14 (70.0%)	2.333	(0.651, 8.954)	0.2005
High Dose	20	17 (85.0%)	5.667	(1.366, 30.064)	0.0242

Odds ratio, confidence interval and Wald p-value are from a binary logistic regression model.
